

Withings Health Solutions And Validic Partner On New Integration Of Best-In-Class Cellular Smart Scales And Blood Pressure Monitors

Boston, October 9, 2023 — Withings Health Solutions, a global leader in innovative and patient-centric connected health devices, is thrilled to announce its suite of cellular devices is now integrated into Validic's healthcare IoT platform. With their combined decades of expertise in transforming patient data into meaningful and actionable insights, these two organizations are advancing healthcare interoperability delivering high-quality patient-generated health data to their clients and partners.

Over the past decade, Validic has developed the largest ecosystem of third-party connected health devices and apps, efficiently streaming personal health data from 570+ home health and wearable devices, helping organizations access blood pressure, pulse oxygen, glucose, heart rate, weight, temperature, sleep, nutrition, respiratory, and activity data through a single endpoint connection.

"Withings Health Solutions has been a partner of ours since 2013, and we are excited to welcome their cellular-connected devices to our ecosystem," said Validic CEO and Co-founder Drew Schiller. "Their commitment to creating an engaging user experience and access to continuous and comprehensive patient-generated data at home aligns with our mission to improve the quality of life by making personal health data actionable. The addition of Withings' cellular devices to our ecosystem reinforces our commitment to delivering an unparalleled experience to our partners and helping people live healthier lives."

Withings Health Solutions is a dedicated division of connected health leader Withings, serving healthcare professionals across chronic disease prevention and management, remote patient monitoring, clinical research, and more. Backed by over 15 years of experience in the consumer industry, Withings Health Solutions is known for its easy adoption and high-engagement devices that seamlessly fit into patients' daily routines with high retention over time.

This integration brings Withings Body Pro, a cellular smart scale, and Withings BPM Connect Pro, a cellular blood pressure monitor, into the Validic ecosystem. The built-in cellular connectivity ensures that care teams receive consistent, continuous, and reliable measurements to make more informed and timely decisions. Designed with inclusivity in mind, these cellular devices come equipped with seamless WiFi and Bluetooth fallback options, ensuring that every patient can participate in their program, even if they live in a cellular dead zone.

Remote health monitoring has quickly become part of the standard of care in the healthcare industry, but the challenges associated with getting access to high-quality patient-generated data have often been overlooked. "There are a lot of moving pieces that need to be aligned for this critical health data to even exist. After years of working closely with the healthcare industry, we have learned that it's the details that make a difference," said Antoine Robiliard, VP of Withings Health Solutions. "With Validic, we share a passion for details, a passion for designing seamless experiences for all stakeholders, and a passion for high-quality data. I'm very excited about this integration because together we solve this data challenge for our shared customers and empower them to focus on what they excel at - providing the best possible care for their patients."

About Withings Health Solutions

Health Solutions is a dedicated division of connected health leader Withings, serving healthcare professionals across chronic disease management, remote patient monitoring, clinical research, and more. Its mission is to bridge the gap between patients and their care teams by continuously and effortlessly providing healthcare professionals with medical-grade data generated by patients from an ecosystem of connected devices. Withings ecosystem includes connected scales, blood pressure monitors, an advanced sleep system, a smart temporal thermometer, and hybrid smartwatches, which all provide the richest array of accurate real-world data. It also includes data connectivity options as well as a remote patient monitoring platform. For more than a decade, Withings has built an expertise in user experience, engagement, and retention. Withings Health Solutions extends this expertise to the healthcare industry to remove friction in the patient's journey and allow for telehealth to expand. About Validic Inc.

Founded in 2010, Validic Inc. is a digital health and personalized care company devoted to our mission of improving the quality of human life by making personal data actionable. With the world's largest health IoT platform and EHR-embedded remote care application, we help healthcare organizations give every person tailored interventions and personalized care, improving healthcare efficiency and delivery and empowering people to play an active role in their health and well-being.

Leading healthcare providers, health plans, and health IT companies, such as Mass General Brigham, Cleveland Clinic, Mayo Clinic, CVS Health, and Elevance Health, use our solutions to deliver high-touch and personalized chronic condition management, remote care, and support for healthy living. With a platform intentionally built to support a broad digital health strategy and scale across populations and conditions, Validic supports the largest RPM program in the country, with more than 300,000 enrolled patients since its inception and 7,000 referring providers. Our digital health platform has 570+ supported devices with more than 15 billion annual data transactions. Our remote care solution is available as a standard integration in the Epic Connection Hub and Cerner Millennium®.

In 2022, Validic received the North American Customer Value Award for the Medical Device Connectivity Industry by Frost and Sullivan and was named Best Overall Connected Healthcare Solution by MedTech Breakthrough. Validic is HIPAA-compliant, HITRUST CSF Certified®, and ISO-27001 certified for Information Security Management. Visit Validic.com and follow @Validic on X and [LinkedIN](#) to learn more.
